E-Participation - Looking Back and Looking Forward

Starting with eVoting 10 years ago

- Use ICT to engage citizens in public policy design

Peaked about 4 years ago

- Palpable lack of political enthusiasm

Transformed into focus on public services not policy

- Use ICT to engage citizens/SME's in public service design

Innovation Challenge: Public Sector Turtles

Innovation Challenge: Public Sector Gazelles

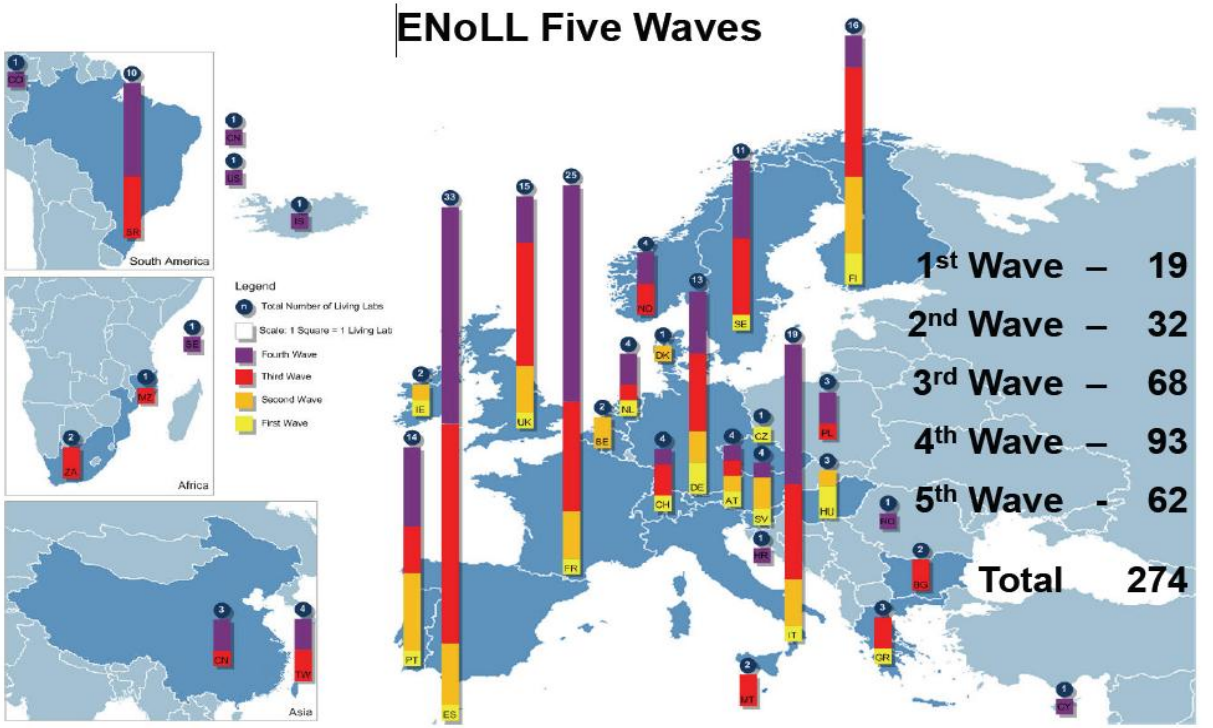

Bridging the Public Sector/SME Gap

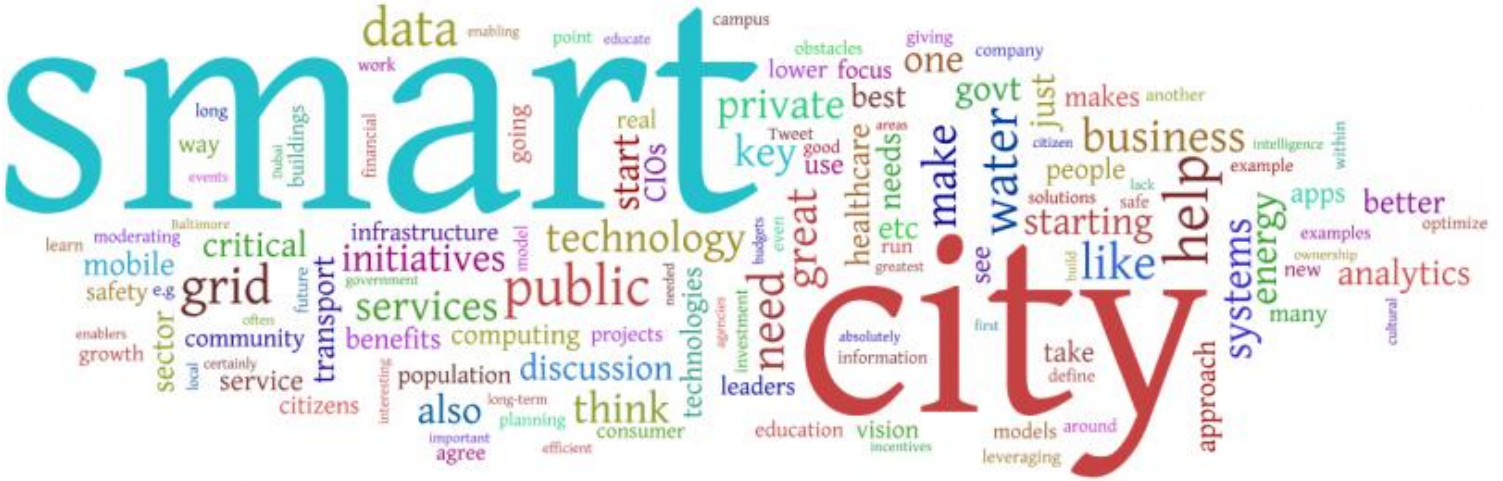

‘A Potential Answer?’

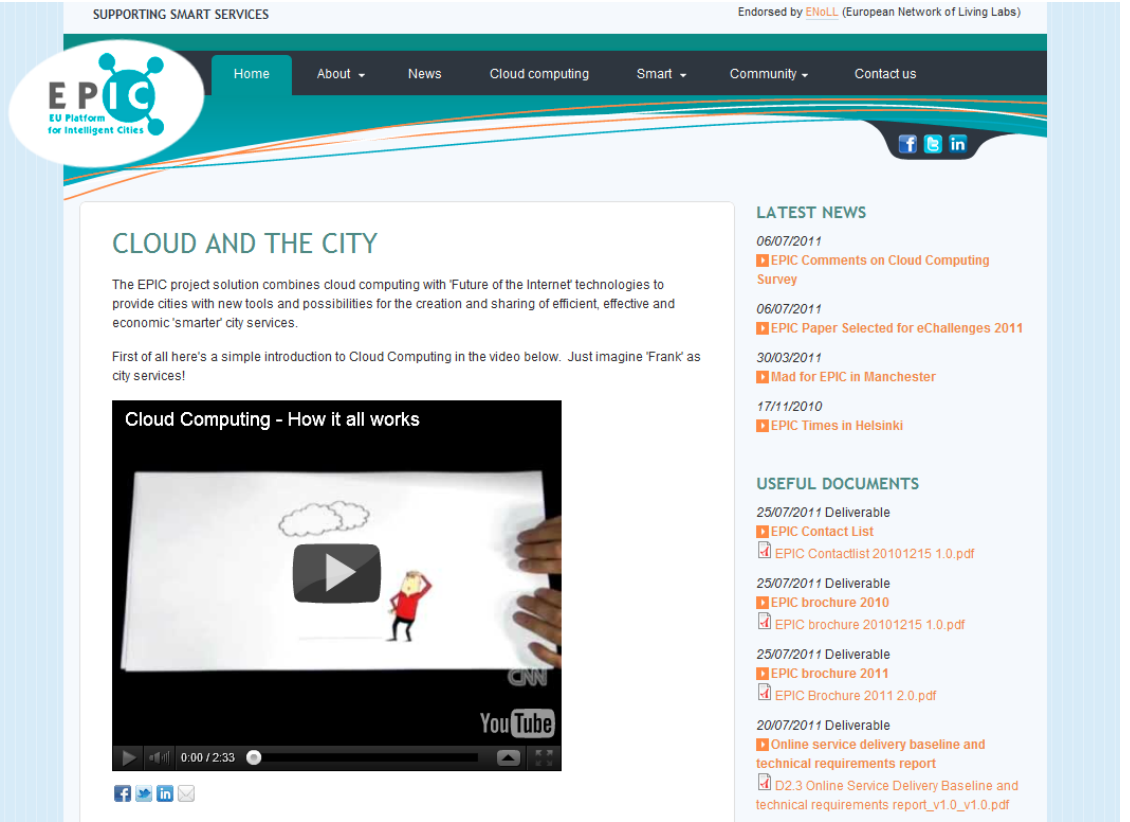

A Growing Global Trend.....

In Europe: A Move to Smarter Cities?

An EPIC Goal...

CLOUD AND THE CITY
The EPIC project solution combines cloud computing with 'Future of the Internet' technologies to provide cities with new tools and possibilities for the creation and sharing of efficient, effective and economic 'smarter' city services.
First of all here's a simple introduction to Cloud Computing in the video below. Just imagine 'Frank' as city services!
Cloud Computing - How it all works

So What Does this All Mean?

Where Are We Now?

Where Are We Going?

And What Does this Mean for Our Turtles and Gazelles?

Are We Entering an Era of Innovation?

Or e-Revolution?

Occupy France
